Different connection addresses

Operators wishing to connect to two different addresses are charged double connection fees (2 X SEK 25.000). If one of the addresses is within the inner city of Stockholm and one of the addresses is outside the inner city, the annual fee for the connection is the mean of the two fees.

(e.g: Ethernet in Stockholm: annual fee for connection within the inner city SEK195.000 + annual fee for connection outside the inner city SEK 280.000 divided by two = an annual fee of SEK 237.500)

Invoice currency

If so desired, Netnod can invoice the Operator in Euro currency. Please note that the Swedish Krona (SEK) and Euro (€) has no fixed exchange rates so the exact fees will differ accordingly from time to time.

The fees are specified excluded of value added tax and other governmental charges.
