Netnod Remote IX

## Peer across all Netnod Internet Exchanges with just one port

Customer benefits

- Use your existing port to interconnect across the Nordics and peer with around 200 AS networks
- Fast provisioning with no extra cross-connect, colocation or equipment costs
- Free secure transport
- Expand your reach with full peering opportunities at any Netnod IX including peering with the route server
- Full redundancy available as an option
- Short term agreement, no contract lock in and 10G prices from 2 500 SEK per month

Power up your port!

Netnod's Remote IX service is the quickest, most cost-effective way to peer across the Nordics. Wherever you are located, use your existing port to connect to any Netnod IX. We manage everything, provide free transport, and ensure low latency, redundancy, and full peering opportunities. Your existing port becomes a gateway to exchange traffic anywhere in the Nordics.

A scalable peering solution

With no extra equipment or Capex costs, this is the most scalable interconnection solution for your business. No contract lock in and easy upgrades gives you complete flexibility as your network evolves.
