NETNOD

ONE PORT

IX**Remote IX****Closed user Group****Cross-IX****Time Direct**

One Port - many benefits

- One port, one cross-connect, one contract
- Easy access to multiple services:
 - Peering at the Netnod IX
 - Closed User Group
 - Remote IX
 - Cross-IX
 - Netnod Time Direct
- Cost effective and scalable
- Easy to administer (Customer Portal)
- Fast provisioning

Netnod Remote IX

Peer across all Netnod Internet Exchanges
with just one port

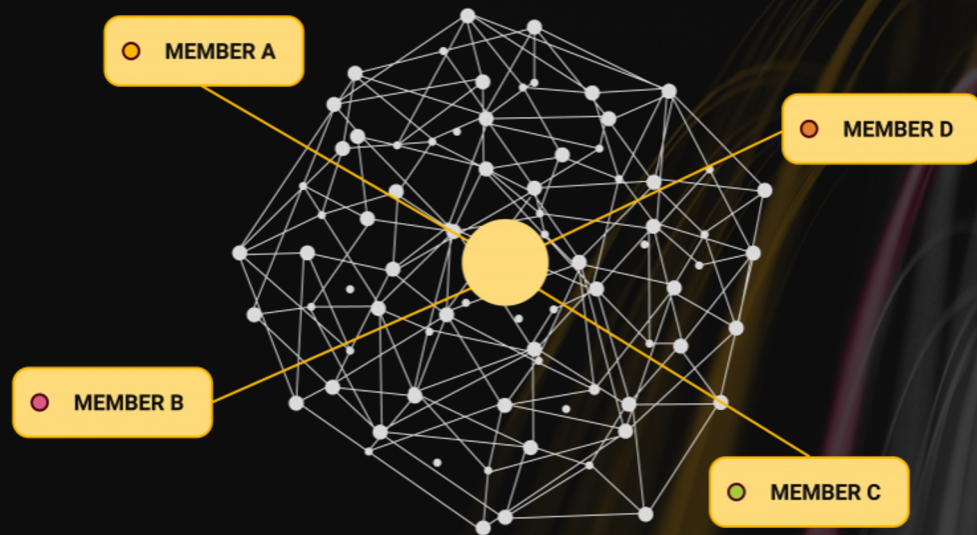

Closed User Group

Secure: fully secured interconnection. You know who is on the other side

Flexible: customise to connect multiple sites, suppliers, partners, or customers

Simple: use your Netnod One Port to connect, or a dedicated port

Members can connect to the same Closed User Group from **multiple locations across all Netnod IXes**

Cross-IX

Connecting Netnod IX Stockholm
and AMS IX Amsterdam

Amsterdam
AMS IX

Stockholm
NETNOD IX

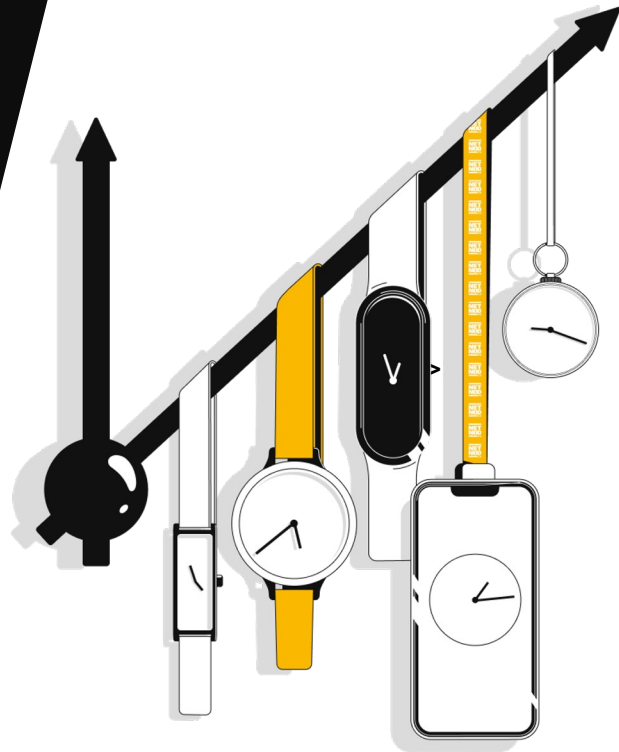

Netnod Time Direct

Time-as-a-service

- A fully managed time service with SLA that guarantees 30 μ s accuracy from UTC
- Delivered over Netnod One Port or dedicated port
- Immediate provisioning and easy integration with current setup

A wide-angle photograph of a large conference hall during a meeting. The room is dimly lit, with green and blue ambient lighting from vertical pillars and stage lights. An audience of people is seated in rows of chairs, facing a stage area where a presentation is being displayed on a large screen. A person is visible on the stage, and another person is standing on the right side of the frame. The ceiling features complex lighting rigs with various fixtures.

Enjoy the Netnod Meeting 2024!
