New

Colleagues

Big thanks

To our sponsors

Product update

Kaj Kjellgren

DWDM transport

- An optical layer point-to-point transmission service
- An industry-leading network with full redundancy and fault monitoring
- Flexible connection options and fast provisioning
- A fully managed solution with SLA
- 10G or 100G connecting regional or metro sites

Customised solutions

- Tell us what you need and we can get a tailored solution up and running fast!
- On net locations at major data centres
- Fibre access provided to other locations
- Redundant service
 - For node level redundancy we can establish connections with different A+B points

NETNOD

ONE PORT

One port, one cross-connect, one contract

- Peering at the Netnod IX
- Remote IX
- Cross-IX
- Closed User Group
- Netnod Time Direct

Same price

More value

Netnod Remote IX

Peer remotely at Netnod IXes with just one port

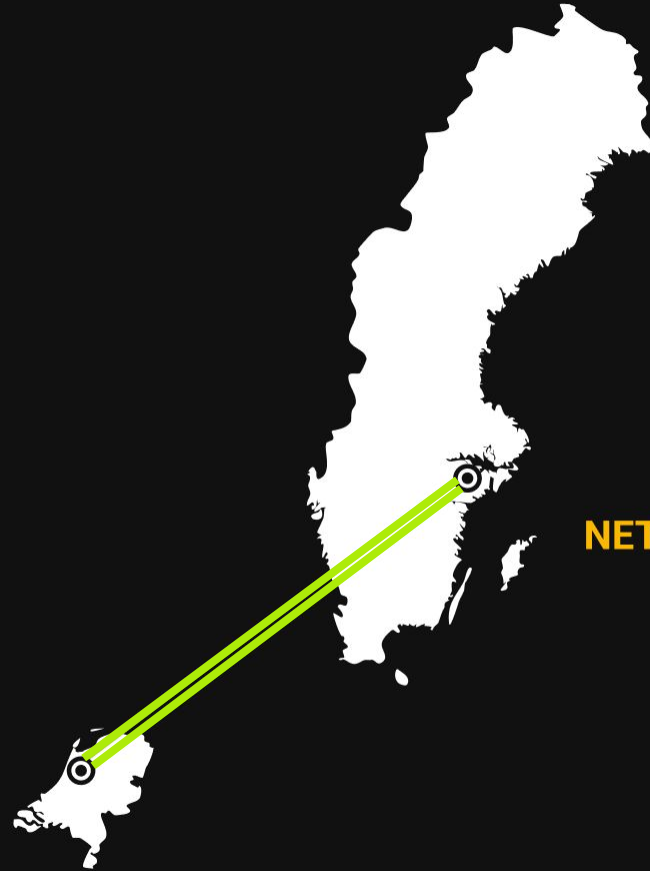

- Stockholm IX
- Copenhagen IX
- Helsinki IX
- Oslo IX
- Sundsvall IX
- Gothenburg IX
- Luleå IX

Cross-IX

Amsterdam ⇄ Stockholm

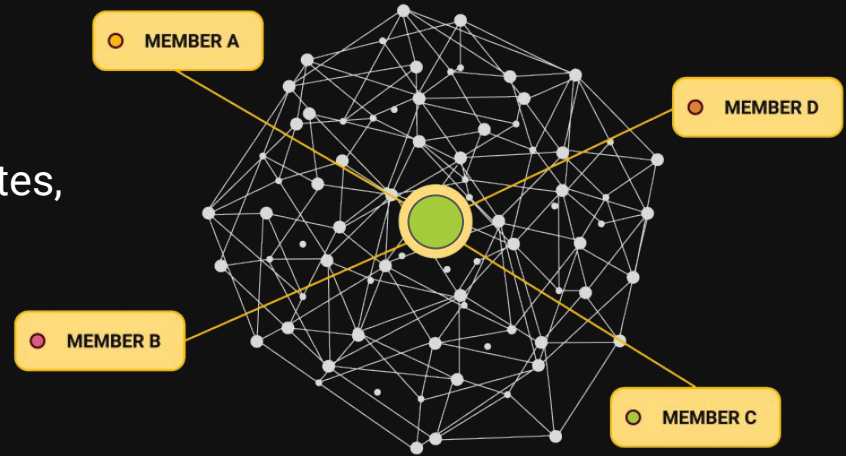

AMS IX

NETNOD IX

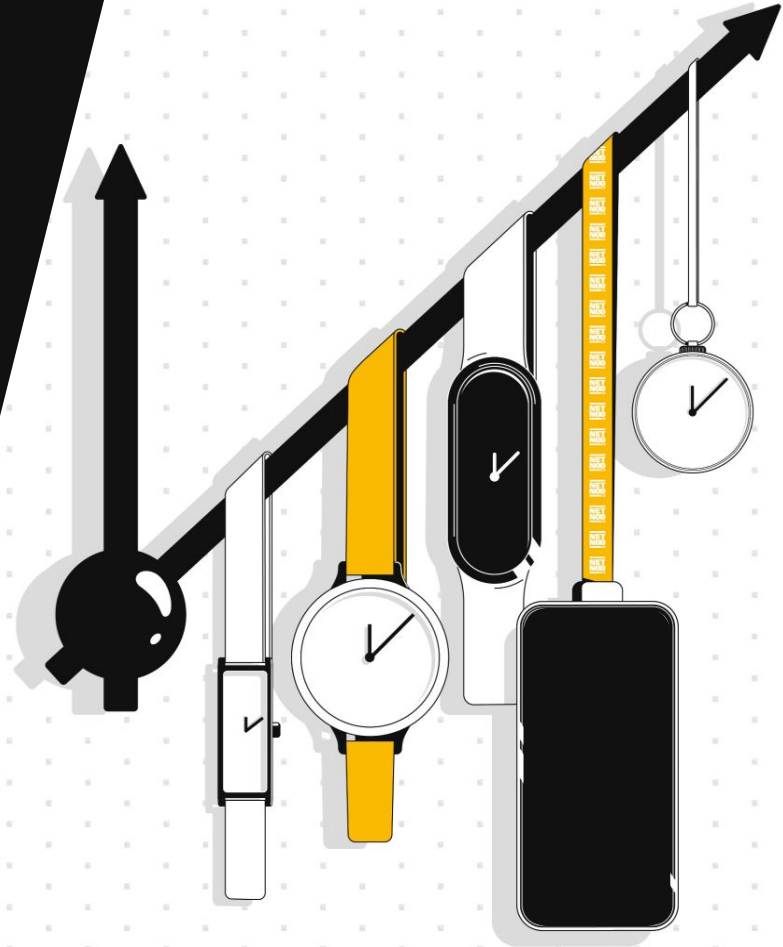

Closed User Group

- Secure: fully secured interconnection. You know who is on the other side
- Flexible: customise to connect multiple sites, suppliers, partners, or customers
- Simple: use your Netnod One Port to connect
- Members can connect to the same Closed User Group from multiple locations across all Netnod IXes

Netnod Time Direct

- A fully managed time service with SLA that guarantees 30 μ s accuracy from UTC
- Delivered over Netnod One Port
- Immediate provisioning and easy integration with current setup

New Netnod service

Netnod's

Robustness for Digitalized Organisations

It's all about

Humans

A partnership

We offer a partnership with digitalized organizations that wants to work effectively and long term. The aim is to identify and secure what is critical for their core services.

Method

- Review of the organization itself and its operations
- Training in Netnod's methodology for security work
- Conduct an exercise to identify critical aspects
- Continuous follow-up, support, and existence of a lifeline

Goals

- ...convert the results of the exercise into capability-enhancing measures that lead towards established resilience goals
- ...increase awareness of internal dependencies and that way decrease risk for moments of surprise
- ...not only set, but also achieve, goals of risk appetite

Can't sleep?
